## 16. Latin America [GOAJ3]

Latin America (including the Caribbean) has the most gold OA journals of any OAWorld region and the highest percentage of free (no-fee) journals and articles. Seven of every ten articles come from Brazil.

## Journals and Articles

Table 16.1. Journals and articles, Latin America

The average APC-charging journal published 2.4 times as many articles in 2017 as the average no-fee journals, but there are so few APC journals that it doesn't make much difference.

Additions to DOAJ make these numbers considerably higher than in the previous study—and gold OA continues to grow in Latin America.

Table 16.3. Article volume, Latin America
Small and medium-sized journals dominate Latin American OA. The top row of Table 16.3 needs clarification: journals are split into groups based on their peak volume, 2012-2017; both of the once-largest journals have been declining ever since 2012.

## APC Levels

Expensive journals account for less than $0.5 \%$ of articles. Average cost per article in fee journals: $\$ 341$. Overall: a very low $\$ 49$.

## Starting Date

Figure 16.2. Starting dates, Latin America
Gold OA has a long tradition in Latin America, with 54 journals before 1980 and another 73 by 1991. New journals peaked in 2010-2011, but continue to appear at a healthy rate.

Table 16.6. Articles and revenue by segment, Latin America
What's interesting about Table 16.6 is what's missing, given that Latin America publishes so much OA: not a single Revenue cell of $\$ 700,000$ or higher-and the most revenue comes from fairly modest fees.

## 16. Latin America [new tables]

Latin America (including the Caribbean) has the most gold OA journals of any region and the highest percentage of no-fee journals and articles. Seven of every ten articles come from Brazil.

Table 16.3. Article volume, Latin America
Small and medium-sized journals dominate Latin American OA. The top row of Table 16.3 needs clarification: journals are split into groups based on their peak volume, 2012-2017; both of the once-largest journals have been declining ever since 2012.

## Starting Date

Figure 16.2. Starting dates, Latin America
Gold OA has a long tradition in Latin America, with 54 journals before 1980 and another 73 by 1991. New journals peaked in 2010-2011, but continue to appear at a healthy rate.

Table 16.6. Articles and revenue by segment, Latin America
What's interesting about Table 16.6 is what's missing, given that Latin America publishes so much OA: not a single Revenue cell of $\$ 700,000$ or higher-and the most revenue comes from fairly modest fees.
